NAVLE Self-Assessments
Candidate Guide

International Council for Veterinary Assessment

The ICVA offers online NAVLE Self-Assessments that align with the exam blueprint. Designed to support candidates as they prepare for the NAVLE, these assessments provide a helpful introduction to the exam's content and structure while highlighting areas of strength and opportunities for further study.

200 ITEMS
4 BLOCKS
2 MODES

NAVLE SELF- ASSESSMENT MODES

Two modes of each assessment are available:

01 **Standard-Paced** — offering section timing of 55 minutes per section and a total test time of 220 minutes, with optional brief breaks between sections, partially aligning with the full NAVLE.

02 **Self-Paced** — offering section timing of 110 minutes per section and a total test time of 440 minutes, providing twice the amount of time offered in the Standard-Paced option.

FEES AND FORMATTING

NAVLE Self-Assessment fees vary based on the format selected and are nonrefundable and nontransferable.

- **Regular** format ($50 USD) includes English Forms 1 and 3, as well as French Form 1, which contains the same items as English Form 1. After completing the assessment, candidates receive a Self-Assessment Report with a projected NAVLE score range based on their performance.
- **Expanded Feedback** format ($65 USD) includes English and French Form 2, as well as English and French Form 4. The French forms contain the same items as their corresponding English forms. In addition to a Self-Assessment Report with a projected NAVLE score range, candidates may review the questions they answered incorrectly.

30-DAY ADMINISTRATION PERIOD

ACCESS

All sections must be completed within the 30 days of launching the exam. Plan to complete the NAVLE Self-Assessment within this time since timing cannot be extended. We encourage you to choose a time that allows you to complete the assessment comfortably within the 30-day window.

PAUSING

During the 30-day access period, candidates may pause the assessment at any time and return to the same section and question, provided the time allotted for that section has not expired. Keep an eye on the time remaining in each section. If the allotted time expires, the section will close automatically and any unanswered questions in that section will no longer be available.

ENDING

After completing a section of the NAVLE Self-Assessment, candidates should select "End" to continue to the next section. Once a section is ended or its time limit expires, it cannot be reopened. After the full assessment is submitted, candidates will no longer be able to return to or review its sections.

PERFORMANCE FEEDBACK

A Self-Assessment Report is available immediately after completion. Candidates should be aware that the projected score range from a standard-paced assessment may provide an indication of potential NAVLE performance. However, achieving a successful score on the NAVLE Self-Assessment does not guarantee a passing result on the NAVLE. To receive the most useful feedback, candidates are encouraged to complete the NAVLE Self-Assessment under conditions that closely resemble the actual exam. Whenever possible, complete the assessment in one sitting using standard-paced mode, with optional brief breaks between sections. Candidates who require additional time may choose self-paced mode, which provides twice the standard testing time. However, please note that feedback generated in self-paced mode may be less precise.
